MEETING GOVERNMENT COMPLIANCE WITH GOVFTP MANAGED FILE TRANSFER

GOVFTP is built for government agencies, their contractors and sub-contractors to share sensitive data with the most stringent U.S. Government security and compliance requirements, including ITAR, DFARS, CJIS and DoD workloads.

WHY THE GOVFTP CLOUD?

FTP Today launched its proven file transfer and file sharing software on a FedRAMP authorized infrastructure and platform in November 2018, after partnering with Rackspace Government Solutions (RGS). The new solution was branded GOVFTP.

Infrastructure & Platform: RGS has two decades of experience with federal security requirements and has worked with over half of all U.S. Cabinet–level agencies. As a FedRAMP authorized Cloud Service Provider (CSP) for both Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS), RGS implements and administers all required security controls based on NIST SP 800-53 and NIST SP 800-171 to meet FISMA, FedRAMP and DFARS guidelines. They specialize in high-security and high-performance solutions, and their platform is monitored and managed 24x7x365 by U.S. persons at their government HQ near Washington, D.C.

Application Software: As a Software-as-a-Service (SaaS) provider, FTP Today layers its applications on top of the RGS platform and inherits all security controls provided by the RGS-managed platform and infrastructure. FTP Today employs exclusively U.S. citizens to develop its software, engineer and manage its systems. As required by NIST 800-171, all file transmission and storage meet FIPS 140-2 cipher strength and enforced encryption requirements.

KEY BENEFITS

Meet Government Compliance and Security Requirements: By choosing the GOVFTP Cloud, you inherit all security controls and compliance at the infrastructure level, at the operating platform level and at the application level.

Instant Deployment: SaaS model allows you to sign up and start sharing sensitive data with customers, suppliers and other business partners the same day.

Low Cost Solution: With an online solution you face no equipment or server infrastructure costs, no backup costs, no bandwidth costs, no extra staff or time consuming maintenance costs.

SECURE SOFTWARE BY DESIGN

The above infrastructure, platform, managed services and applications are our responsibility, providing you a foundation for your compliance requirements. You can then take advantage of our software to fully enforce your file sharing security. We make it easy by providing you with administrative tools to:

- Manage Encrypted Protocols: FTPeS, FTPS, SFTP & HTTPS
- Restrict Logical Access by Country (Geo-IP)
- Enforce Password Strength & Expiration
- Allow or Require SSH-key Authentication (SFTP)
- Suspend or Auto-Suspend Inactive Users
- Require Multi-Factor Authentication per User
- Restrict User Access by Specified IP Address or range
- Restrict User Access by Protocol
- Restrict Permissions per User, per Folder: Upload, Download, Delete, List
- Manage File Retention Controls
- Manage Activity-triggered Email Notifications
- View & Export Activity Reports
- View & Export Detailed Logs

TRUST FTP TODAY

- World's first SFTP hosting service (2001)
- 20+ years of hosting experience
- High Availability VMware® Cloud
- Dedicated Cisco® firewalls
- Cisco® Firepower® Network IPS
- Host-based Intrusion Detection
- Proprietary Hacker IP Blacklisting
- Trend Micro® Virus & Spyware Protection
- Offsite Backup
- Standby Disaster Recovery
- Managed only by U.S. Citizens

INFRASTRUCTURE & PLATFORM COMPLIANCE AND SECURITY

- SSAE-18 SOC1, SOC3, SOC3 (Type 2)
- ISO 27001 Certified
- PCI-DSS Certified
- HIPAA / HITECH Ready
- EU-US PRIVACY SHIELD Certified
- FedRAMP JAB authorized
- FISMA authorized
- NIST 800-53 security controls
- NIST 800-171 ("DFARS") ready
- CJIS, ITAR and FIPS 140-2 compliant
- Staffed only by U.S. persons
